## SUMMARY :

I am a passionate AI and Data Science student currently building strong skills in Python programming and starting my journey in Machine Learning. I have a good understanding of Python basics and am learning how to apply it to real-world data problems using tools like Pandas and NumPy. With a growing interest in AI and data analysis, I am eager to explore machine learning, model training, and data visualization. I am looking for opportunities to apply my skills, learn from real projects, and grow in the tech field.

---

## SKILLS :

- Programming Language : **Python**
  - Web development : **HTML5**
- 

## EDUCATION :

**Mahendra College of Engineering** (2022-2026)  
• Bachelor of Technology (AI&DS)  
CGPA-7.1 (Upto 5<sup>th</sup> sem)

**Saraswati Matric Higher Secondary School**  
• Higher Secondary Certificate (HSC) - **76.6 %** (2022)  
• Secondary School Leaveing Certificate (SSLC) – **73.4 %** (2020)

---

## PROJECT :

### 1. Customer Care Support Chatbot

A web-based chatbot built using Python (Flask) and HTML/CSS to assist customers with common queries. It provides instant, automated responses to FAQs, improving user support efficiency. The chatbot features a simple UI, handles real-time queries, and uses predefined responses with optional AI integration for smart replies.

2.
